

Endpoint web protection for every managed device

AdLock blocks ads, malvertising, trackers and phishing domains on employee and student devices – deployed silently through Microsoft Intune, with no action required from end users.

Windows

macOS

iOS

Android

Browser extension

THE PROBLEM

- **Ads are an attack path.** Malvertising and phishing reach devices through ad networks on legitimate sites.
- **No control outside the office.** Remote devices move between networks, beyond the corporate gateway and VPN.
- **Wasted bandwidth and time.** Ad and tracker traffic slows page loads on every endpoint.

WHAT ADLOCK DOES

- **Blocks ads system-wide**, in all browsers and in applications – not a single-browser extension.
- **Stops malvertising and phishing** domains before the page loads.
- **Disables trackers** that collect activity data from managed devices.
- **Keeps configuration fixed** through a corporate activation key on managed endpoints.

DEPLOYMENT – HOURS, NOT WEEKS

01

Add

Upload the AdLock package to Microsoft Intune as a Win32 app.

02

Assign

Target your device groups. Active Directory and GPO are also supported.

03

Protect

AdLock installs and activates silently – users never enter a license key.

Tested in a live Intune environment. Silent MSI install, central license activation by signed PowerShell script, silent updates and uninstall. Android ships as a Managed Google Play private app for Android Enterprise. No antivirus conflicts.

WHY ORGANIZATIONS TRUST ADLOCK

ISO 27001

Certified information security management system

FBI & CISA

Recommend ad blocking as a security control

80+

Organizations protected · 4M+ installs, 4.5★ rating

BUILT FOR

Education K-12 districts – students and staff on school devices.

Public sector PO procurement, independently audited EU vendor.

Business Remote employees on any network, in or out of VPN.

PRICING

Per-device annual licensing – quoted on request.

Send us your device count and preferred term, and we will prepare a formal quote within one business day. We offer favourable terms for larger volumes and multi-year commitments.

Every license includes all platforms, product updates, email support within 1 business day and deployment assistance.

HOW TO BUY

- **Free 14-day pilot** on a group of devices, no credit card.
- **Direct purchase** by quote, purchase order or invoice.
- **Through your reseller** – ask your IT reseller to quote AdLock.

Invoicing from Hankuper s.r.o. (Slovakia, EU) or PayPro Global (North America), in USD.
